INTRODUCTION

The purpose of this catalogue of selected Statistics Canada data on families is to provide a useful reference tool to users of data on families produced by Statistics Canada, covering the period from 1984 to 1989. Statistics Canada's Census of Population and Housing, as well as its numerous other surveys, provide a wealth of information on Canada's families. Some of this information is easily found, for example, the regular family publications from the census. Other valuable sources are sometimes more difficult for the inexperienced user to access, for example, an isolated article in a publication from the Labour Force Survey which presents data on families.

The idea for a single reference tool for users of Statistics Canada data on families was a response to this latter situation. Under the Target Groups Project, a comprehensive survey of all Statistics Canada data sources, both published and non-print, was conducted. This review was then compiled into the present catalogue.

Users of this catalogue should note certain important points. Firstly, the catalogue is not meant to be a completely exhaustive catalogue of all published family data. Only publications having a regular presentation of family data and publications having special emphasis on family data are included. It would be impossible, in a document of this type, to list all publications that contain any family data, therefore some minor articles or publications have been excluded. Users should also note that sources dating prior to 1984 have not been included.

Secondly, in order to minimize the size of this catalogue, the descriptions of the contents of the various sources have been limited to essential details; users are strongly encouraged to consult the actual publications or contact the divisions responsible for more detailed information. Complete information on ordering the products included herein is found in Section 6.

Thirdly, the prices shown for publications were those in effect at the time of writing, and are for the latest issue available at that time. Prices for other issues may differ, and price fluctuations may have occurred since the publication of this catalogue.

Fourthly, certain publications, especially from the 1986 Census, were planned for impending release but were not yet available at the time of this writing. These are noted as due to be released in the descriptions.

Finally, users of this catalogue should note that the different sources of data on families referenced herein do not all use the same definition of a "family". There are certain subtle but important differences in the family concepts used in the census and in family projections (census families), in the Labour Force Survey and the Survey of Consumer Finances (economic families), and in the Family Expenditure Survey (spending unit). The differences between the definitions employed in these different surveys are explained in the Guide to Statistics Canada Data on Families, referenced herein in section 3.

2. REGULAR PUBLICATIONS CONTAINING FAMILY DATA

(Note: Catalogue numbers are in parentheses after titles.)

A - Census publications

Only publications from the 1986 Census are included in this catalogue, even though certain publications from the 1981 Census appeared after 1984. Publications similar to the ones listed here are available from most previous censuses (eg, 1981, 1976, 1971, 1966, 1961). Readers should keep in mind that, inasmuch as the 1981 Census contained a question on fertility while the 1986 Census did not, they may wish to consult certain analytical papers from the 1981 Census (for example, from the Descriptive Series, Canada's Lone Parent Families, Cat. no. 99-933, or the occasional publication The Family Life Cycle and Housing Consumption in Canada, Cat. no. 92-X-517).

Families: Part 1 (100% data) (93-106)

This publication, from the 1986 Census "Nation" series, contains 8 tables showing data on census families, family persons, census family status, and non-family persons. All tables are for Canada, the provinces and the territories. Prices are \$28 in Canada and \$29.50 elsewhere. To order, see Section 6, or contact the Housing, Family and Social Statistics Division of Statistics Canada for more information.

Families: Part 2 (20% data) (93-107)

This publication, from the 1986 Census "Nation" series, contains 19 tables showing data on census families, family persons, census family status, and non-family persons. Most tables are for Canada, the provinces and the territories and a few are for Canada only. Prices are \$43 in Canada and \$53 elsewhere. To order, see Section 6, or contact the Housing, Family and Social Statistics Division of Statistics Canada for more information.

Family Income: Census Families (93-117)

This publication, from the 1986 Census "Nation" series, contains 10 tables showing data on census families by various family characteristics, and also showing 1985 family income. All tables are for Canada, the provinces and the territories. Prices are \$26 in Canada and \$38 elsewhere. To order, see Section 6, or contact the Labour and Household Surveys Analysis Division of Statistics Canada for more information.

Family Income: Economic Families (93-118)

This publication, from the 1986 Census "Nation" series, contains 7 tables showing data on economic families by various family characteristics, and also showing 1985 family income. All tables are for Canada, the provinces and the territories. Prices are \$29 in Canada and \$31 elsewhere. To order, see Section 6, or contact the Labour and Household Surveys Analysis Division of Statistics Canada for more information.

Families in Canada (98-127)

This publication, from the 1986 Census "Focus on Canada" series, describes recent demographic trends and their role in creating a diversity of families in Canada. The analysis takes into account living arrangements, family structure, presence and age of children, and labour force participation of family members. Data are

analyzed at the Canada level. Prices are \$10 in Canada and \$11 elsewhere. This publication was not yet available at the time of this writing. To order, see Section 6, or contact the Housing, Family and Social Statistics Division of Statistics Canada for more information.

Family Income (98-128)

This publication, from the 1986 Census "Focus on Canada" series, concentrates on an examination of changes in family income between 1980 and 1985 in terms of constant (1985) dollars, by selected characteristics such as family structure, life cycle, work activity and major source of income. The study highlights the relative positions of various regions. Prices are \$10 in Canada and \$11 elsewhere. This publication was not yet available at the time of this writing. To order, see Section 6, or contact the Labour and Household Survey Analysis Division of Statistics Canada for more information.

Socio-economic Characteristics of Farm Operators and Their Families (96-114)

This publication, from the 1986 Census of Agriculture, contains numerous charts and tables showing data on farm operators and their families by various family characteristics. The analysis is mostly for Canada, and some also covers the provinces and territories. Prices are \$33 in Canada and \$43 elsewhere. This publication was not yet available at the time of this writing. To order, see Section 6, or contact the Agriculture Division of Statistics Canada for more information.

B - Family History Survey Publications

The Family History Survey was a special survey conducted in 1984, to provide new insights into the relationship between significant demographic events - such as births, deaths, marriages, divorces, and work interruptions - and movement through the family life cycle. The four publications produced from the Family History Survey represent the first set of longitudinal data on family histories ever produced by Statistics Canada.

Family History Survey Preliminary Results (99-955)

This publication presents the preliminary findings from the 1984 Family History Survey, emphasizing points on which reliable national estimates were being provided for the first time. Most data are at the Canada level, although one section looks at regional differences. Prices are \$20 in Canada and \$21 elsewhere. To order, see Section 6, or contact the Housing, Family and Social Statistics Division of Statistics Canada for more information.

Lone-Parenthood: Characteristics and Determinants (99-961)

This publication presents longitudinal family data from the 1984 Family History Survey, in 41 charts and tables on various aspects of lone parenthood. All data are at the Canada level. Prices are \$20 in Canada and \$21 elsewhere. To order, see Section 6, or contact the Housing, Family and Social Statistics Division of Statistics Canada for more information.

Women's Work Interruptions (99-962)

This publication presents longitudinal family data from the 1984 Family History Survey, in 22 tables on various aspects of women's work interruptions, including a look at their effect on family formation. All data are at the Canada level. Prices are \$16 in Canada and \$17 elsewhere. To order, see Section 6, or contact the Housing, Family and Social Statistics Division of Statistics Canada for more information.

Union Formation and Dissolution (99-963)

Using Family History Survey data, this publication examines the formation and dissolution of marriages and common-law unions, at the Canada level. Prices are \$16 in Canada and \$17 elsewhere. To order, see Section 6, or contact the Housing, Family and Social Statistics Division of Statistics Canada for more information.

C - Survey of Consumer Finances

(This annual survey is an important source of data on family incomes in Canada).

Income Distributions by Size in Canada (13-207)

This publication, from the Survey of Consumer Finances, contains numerous detailed tables showing data on economic (extended) family incomes. Most tables are for Canada and the regions, and many also show provincial data and urban size groups. The latest issue available at the time of this writing was priced at \$39 in Canada and \$47 elsewhere. To order, see Section 6, or contact the Household Surveys Division of Statistics Canada for more information.

Family Incomes: Census Families (13-208)

This publication, from the Survey of Consumer Finances, contains 22 tables showing data on census (nuclear) family incomes. Most tables are for Canada, and many also show provincial and regional data and some show urban size groups. The latest issue available at the time of this writing was priced at \$18 in Canada and \$22 elsewhere. To order, see Section 6, or contact the Household Surveys Division of Statistics Canada for more information.

Income After Tax, Distributions by Size in Canada (13-210)

This publication, from the Survey of Consumer Finances, contains numerous detailed tables showing data on economic (extended) family incomes after taxes. Most tables are for Canada, and many also show provincial and regional data and some show urban size groups. The latest issue available at the time of this writing was priced at \$25 in Canada and \$30 elsewhere. To order, see Section 6, or contact the Household Surveys Division of Statistics Canada for more information.

Earnings of Men and Women (13-217)

This publication from the Survey of Consumer Finances contains two tables showing earnings of wives and family incomes, plus some data on individual incomes by marital status, family type, and relationship. Most tables are at the Canada level. The latest issue available at the time of this writing was priced at \$20 in Canada and \$24 elsewhere. To order, see Section 6, or contact the Household Surveys Division of Statistics Canada for more information.

D - Other regular publications

Canadian Social Trends (11-008)

This quarterly publication, while not devoted to family data, frequently contains articles that pertain to the family or to family-related issues. These articles are listed in Section 4. The publication is priced at \$8/issue and \$32/year in Canada, and \$9/issue and \$36/year elsewhere. To order, see Section 6, or contact the Housing, Family and Social Statistics Division of Statistics Canada for more information.

Family Food Expenditure in Canada (62-554)

This publication, from the Food Expenditure Survey (the latest of which covered the 1986 calendar year), contains numerous detailed tables showing spending on a wide list of food items by families and also by different family characteristics. Most tables are for Canada and the ten provinces. The latest issue available (from the 1986 survey) was priced at \$38 in Canada and \$46 elsewhere. To order, see Section 6, or contact the Household Surveys Division of Statistics Canada for more information.

Family Expenditure in Canada (62-555)

This publication, from the Family Expenditure Survey (the latest of which covered the 1986 calendar year), contains numerous detailed tables showing spending on a wide list of items by families and also by different family characteristics. Most tables are for Canada and the ten provinces. The latest issue available (from the 1986 survey) was priced at \$28 in Canada and \$29 elsewhere. To order, see Section 6, or contact the Household Surveys Division of Statistics Canada for more information.

The Labour Force (71-001)

This monthly publication, from the Labour Force Survey, contains mostly individual level data. It is included here because it contains two family-level tables, and also because, until mid-1989, it featured, from time to time, special articles that dealt with family data and family-related issues. See Section 4 for a list of these family-related articles published in 1984-1989. The latest issue available at the time of this writing was priced at \$17/issue or \$170/year in Canada, and \$20.40/issue and \$204/year elsewhere. To order, see Section 6, or contact the Household Surveys Division of Statistics Canada for more information.

Perspectives on Labour and Income (75-001)

This quarterly publication presents special articles and studies some of which, prior to mid-1989, would have been featured in the monthly The Labour Force (71-001). The articles in the publication mostly deal with the labour force, but special articles on families and family characteristics will appear from time to time. The only issue available (Sept. 1989) was the Summer 1989 issue, priced at \$12.50/issue or \$50/year in Canada, and \$15/issue or \$60/year elsewhere. To order, see Section 6, or contact the Labour and Household Surveys Analysis Division of Statistics Canada for more information.

Post Censal Estimates of Families: Canada, Provinces and Territories (91-204)

This annual publication, based on census data, contains numerous charts and tables showing post-censal estimates of the number of families, by various family characteristics. Estimates are provided for Canada, the provinces and the territories. The latest issue available at the time of this writing was for June 1 1989, priced at \$21 in Canada and \$25 elsewhere. To order, see Section 6, or contact the Demography Division of Statistics Canada for more information.

3. OCCASIONAL AND NON-CATALOGUED PUBLICATIONS

Listing of Supplementary Documents (11-207)

This occasional publication is a valuable bibliography of technical papers, working papers, and research papers written by Statistics Canada experts but not included in the body of official publications. This listing references a wealth of information, some of which touches on topics of interest to users of family data. The latest issue available at the time of this writing covered the period from 1982-1986, priced at \$25 in Canada and \$26 elsewhere. To order this publication or any of the papers referenced therein, see Section 6, or contact your regional reference centre or the Library Services Division of Statistics Canada for information.

Characteristics of Dual-Earner Families: Analytic Report #3 (13-5883)

This occasional publication is an analytic report on an in-depth study of the characteristics of Canada's families that have two income-earners. The data are from the 1986 Census and other surveys. The publication is priced at \$25 in Canada and \$30 elsewhere. To order, see Section 6, or contact the Labour and Household Surveys Analysis Division of Statistics Canada for more information.

Family Characteristics and Labour Force Activity: Annual Averages (71-533)

This occasional publication, from the Labour Force Survey, contains 27 tables showing labour force activity of individuals by the characteristics of their families. The tables are for Canada and the ten provinces. The latest issue available (Sept. 1989) covered the 1977-1984 period, and is priced at \$33 in Canada and \$34.50 elsewhere. To order, see Section 6, or contact the Labour and Household Surveys Analysis Division of Statistics Canada for more information.

Family and Friendship Ties Among Canada's Seniors (89-508)

This occasional publication is an introductory report of findings from the 1985 General Social Survey. The first chapter of the report presents data and analysis on family and friendship ties among Canada's seniors. Data are for Canada as a whole. Prices are \$20 in Canada and \$22 elsewhere. To order, see Section 6, or contact the Population Studies Division of Statistics Canada for more information.

The Family in Canada: Selected Highlights (89-509)

This occasional publication is a special compilation of Statistics Canada data on families from a wide variety of sources. It contains 54 charts and tables, highlighting the changes in many aspects of family life in Canada, using data from various surveys and from the Census. Data are at the Canada level. Prices are \$35 in Canada and \$36 elsewhere. To order, see Section 6, or contact the Target Groups Project, Housing Family and Social Statistics Division of Statistics Canada for more information.

Intercensal Estimates of Families, Canada & Provinces (First Issue) 1981-1986 (91-529)

This occasional publication, based on Census data, contains numerous charts and tables showing post-censal estimates of the number of families, by various family characteristics. Estimates are provided for Canada, the provinces and the territories, for 1981, 1982, 1983, 1984, 1985, and 1986. Prices are \$36 in Canada and \$37 elsewhere. To order, see Section 6, or contact the Demography Division of Statistics Canada for more information.

Interim Household and Family Projections for Canada, Provinces and Territories to 2006 (Non-catalogued)

This publication presents projections of the number of families in Canada, the provinces and the territories from 1986 to the year 2006. Also includes estimates for census years back to 1961. Some tables show family types. Prices are \$14 in Canada and \$17.50 elsewhere. To order, see Section 6, or contact the Demography Division of Statistics Canada for more information.

A Guide to Statistics Canada Data on Families (non-catalogued)

This publication is a special guide produced by the Target Groups Project of Statistics Canada to document the definitions of "families" as employed in different surveys, and to show the differences and comparability of their data. Prices are \$10 in Canada, \$11 elsewhere. To order or for more information, contact the Target Groups Project in the Housing, Family and Social Statistics Division of Statistics Canada.

4. ISOLATED ARTICLES OF INTEREST

Note: only articles published in 1984-1989 in official Statistics Canada publications are included here.

A. Canadian Social Trends (11-008)

"Families: Diversity the New Norm" (Summer 1986)

"Child Care" (Summer 1986)

"Births to Unmarried Women" (Summer 1986)

"Common-Law: Living Together as Husband and Wife Without Marriage" (Autumn 1986)

"The Decline of Real Family Income, 1980 to 1984" (Winter 1986)

"Children in Low-Income Families" (Winter 1986)

"Tying the Knot: An overview of Marriage Rates in Canada" (Autumn 1987)

"Women Parenting Alone" (Winter 1987)

"1986 Census Highlights: Marital Status" (Spring 1988)

"Common-Law Unions: Nearly Half a Million in 1986" (Autumn 1988)

"Female Lone Parenthood: The Duration of Episodes" (Autumn 1988)

"Divorce Rates in Canada" (Winter 1988)

"Dual-Earner Families: The New Norm" (Spring 1989)

"1986 Census Highlights: Changes in Living Arrangements" (Spring 1989)

"Older Children Living at Home" (Summer 1989)

"Violence in the Family: Family Homicide" (Autumn 1989)

"Help Around the House: Support for Older Canadians" (Autumn 1989)

B. The Labour Force (71-001)

"Canadian Husband-Wife Families: Labour Force Participation and Income Trends 1971-1981" (May 1984)

"Lone Parents" (July 1984)

"Family Characteristics and Labour Force Activity: An Update" (May 1986)

"Labour Market Activities of High-Income Families" (August 1986)

"Time Loss from Work for Personal Reasons" (May 1988)

"The Decline of Unpaid Family Work" (May 1988)

5. NON-PRINT SOURCES OF FAMILY DATA

A. Census Custom Products Service

Within the constraints imposed by the protection of confidentiality, custom products can be produced from the 1971, 1976, 1981 and 1986 Census micro-databases. Products are developed to meet the needs of individual clients, according to their exact requirements in terms of a) content (eg. new combinations of variables, new distributions of existing variables, creation of new variables derived from existing ones), b) geography (eg. standard areas, combinations of standard areas, user-defined or geocoded areas), and c) format and output medium (eg. specialized formats compatible with users' computer systems, different media such as computer print-out, magnetic tape or microfiche). All user-specified requests are cost-recoverable. Cost estimates and completion times are supplied to the user before work commences. To order, or for more information, contact the Census Custom Products Service, Census Operations Division, Statistics Canada.

B. Survey of Consumer Finance and Household Facilities and Equipment Survey File Link

Four microdata tapes containing information on the 1987 incomes of households, economic families, census families, and individuals are available at a cost of \$800 each. A "key file" allowing the linkage of records across all four tapes, thereby giving users greater flexibility in the creation of variables and units of analysis, is also available at a cost of \$800.

In addition to income by sources such as earnings, investment income and government transfer payments, the files contain numerous personal, family and labour-related characteristics. The income data were collected as part of the 1988 Survey of Consumer Finances. The housing, facilities and equipment data were collected by the 1988 Household Facilities and Equipment Survey.

An expanded Household Income, Facilities and Equipment file, containing additional information from the Shelter Cost Survey is also available, at a cost of \$1,000. To order, or for more information, contact the Income and Housing Surveys Section of the Household Surveys Division of Statistics Canada.

C. Family Expenditure Survey

A number of special data products are available from the Survey of Family Expenditures. Firstly, a series of special, detailed tables can be purchased on microfiche or hard-copy. Secondly, a series of tables is available on computer diskette. Thirdly, special tabulations can be produced to user specifications on a cost-recoverable basis. Finally, a public use microdata tape based on the 1986 survey has been prepared for distribution. Copies of the tape and associated documentation are priced at \$700. To order any of these special products, or for more information, contact the Family Expenditure Surveys Section, Household Surveys Division, Statistics Canada.

D. Experimental Data Base of Family Data for Small Areas

Some experimental family data are available for small areas across Canada. Statistics such as family size and family income by sources of income are offered through special tabulations. The data are compiled for the years 1982 through 1986 inclusively. All requests are produced on a cost-recovery basis. To order, or for more information, contact the Small Area and Administrative Data Division of Statistics Canada.

E. SPSPD/M

The Social Policy Simulation Database and Model is a powerful instrument for the analysis of tax and social policy reform. The model makes it possible to explore innovative social programs, establish the cost of deductions, credits and tax rates, and check how proposed changes would affect individuals, families and governments. The database and model present a detailed portrait of over 160,000 composite individuals, covering 350 demographic and socio-economic variables. The SPSPD/M includes both data and analytical software in an IBM PC-based package, available for \$5,000 for a single-user license and \$12,500 for a site license (the latter allows the user to make copies). A demonstration version is available for \$100. To order, or for more information, contact the Electronic Data Dissemination Division of Statistics Canada.

F. CANSIM

CANSIM is the Canadian Socio-Economic Information Management System, Statistics Canada's computerized data bank. Data on families can be found in the cross-classified database's statistical tables, and in the Census Summary Database. These bases offer small area data, and can be accessed on-line by users having terminals, or at any Statistics Canada regional office. CANSIM also offers user summary tapes and Census summary data on diskette. All requests are produced on a cost-recoverable basis. To order, or for more information, contact the Electronic Data Dissemination Division of Statistics Canada.

6. HOW TO ORDER

To order any of the publications listed in this catalogue, simply complete, cut out, and mail the order form found on the last page of this catalogue. Be sure to include the catalogue number (found in this catalogue in parentheses after the title of every publication) of every publication that you wish to order. For non-catalogued publications, indicate N/A in the space for the catalogue number.

To order non-print products, simply contact the division responsible within Statistics Canada, or else contact your nearest Statistics Canada Regional Reference Centre (which can channel your order or provide the telephone number of the division responsible). Users should note that all data requests are produced on a cost-recoverable basis.

Each Statistics Canada Regional Reference Centre provides a full range of Statistics Canada's products and services. Each is equipped with a library and a sales counter where users can consult or purchase publications, diskettes, microfiche, maps and more. In addition, each has facilities to retrieve information, on-line, from CANSIM. A telephone inquiry service is also available, with toll-free numbers for regional clients outside local calling areas. Call or write your Regional Reference Centre for more information.
